

To whom it may concern

Recommendation Letter for Alexander Borisov.

I first met Alexander at Funabashi Japanese Language School Only One. Alexander always showed himself to be a friendly person, ready to help in difficult moments. He often helped other students by explaining complex teaching materials. Alexander always strived to be the best in his studies, the result of his efforts was to be in the best class of the school.

Alexander is ambitious and achieves his goals at any cost. Despite his young age, he speaks 4 languages, has a wide range of knowledge in economics as well as technical sciences.

I worked with Alexander together analyzing the stock market as well as the cryptocurrency market. Alexander has studied a lot of materials, charts, articles, news in different languages. The result of his work was a large number of successful investments for our joint work. One of the examples is investment in ICO Zebi cryptocurrency, which brought 1200% profit. This investment was only available thanks to Alexander's hard work and his talent to reach the CEO of the project, and agree on investment on favorable terms for our side.

Alexander is cold-blooded for failures and sees them as a great chance to learn something new. Speaking about the stock and cryptocurrency markets, he calmly analyzed all failures and never lost control over his emotions.

At the moment, he studies programming on his own, Alexander devotes all his free time to it, making phenomenal progress in the shortest possible time. Just like it was with economics, linguistics and other sciences.

I believe that Alexander's high intellect, as well as his strong desire to achieve goals, will be a great addition to any team.

Please feel free to contact me at any time if you have any questions regarding Alexander.

Sincerely yours,

Victor Dontsov
